Experience

- **Ahimaysoft Technology Solutions** July 2025 - Dec 2025
Full stack software engineer

Education

- **B V RAJU INSTITUTE OF TECHNOLOGY** 2019
B Tech
7.6
- **NARAYANA JUNIOR COLLEGE** 2015
BIE
83%
- **KRISHNAVENI TALENT SCHOOL** 2013
Ssc
6.5

Certificates

- **NxtWave Disruptive Technologies** feb - 2025
Continuous Capacity Building program Intensive Bootcamp Trainee
Developed a Keen understanding on the Fundamentals of Programming with Python concepts
Able to build impressive Static, Dynamics and Responsive Website using JS

Skills

- React Js
- JavaScript, css, html, bootstrap
- UI Libraries :Bootstrap, Material UI
- Java

Projects

- **Point of Sale (POS) system**

Tech Stack used : java 21, Spring Boot, React 18, tailwind css, MySQL.

Description : Developed a comprehensive, full-stack Point of Sale (POS) system for retail businesses enabling real-time sales processing, inventory management, customer relationship management, cashier reconciliation, and analytics across multiple stores with mobile and web support.

Roles and Responsibilities:

- Developed complete product lifecycle management (CRUD) with store-scoped data isolation
- Implemented product variant system supporting size, color, and custom attributes with dynamic pricing.
- Built CSV bulk import/export functionality for mass product updates with validation (500+ products in single upload)
- Implemented inventory tracking with real-time stock quantity updates and low-stock alerts

- Implemented dynamic table layouts switching between card view (mobile) and table view (desktop)
- **Bookmark Maker**
 - Developed bookmark maker where user can add a list of websites with custom names and can visit bookmarked website later by clicking on the specific website
 - The displayed list of bookmarks with HTML list elements with hyperlink as URL, styled todo list using CSS, Bootstrap.
 - Displayed a new bookmark dynamically in the UI by using JavaScript DOM operations when the user submitted the form with bookmark details.
 - Implemented add bookmark functionality by using Form inputs, JavaScript event listeners, names, and clicking on a particular bookmark opens the website in a new tab.

Technologies used: HTML, CSS, JS, Bootstrap
, React js
